For free access to Globethics online library and to receive regular newsletter with news and updates from ethics professionals in the network.

About World Environment Day

World Environment Day (WED) is celebrated annually on 5 June and encourages awareness and action for the protection of the environment. It is supported by many non-governmental organizations, businesses, government entities, and represents the primary United Nations outreach day supporting the environment.

World Environment Day was established in 1972 by the United Nations during the Stock-holm Conference on the Human Environment. The event was a result of discussions on the impact of human interactions on our environment.

First held in 1973, it has been a platform for raising awareness on environmental issues as marine pollution, overpopulation,

global warming, sustainable development and wildlife crime. World Environment Day is a global platform for public outreach, with participation from over 143 countries annually.

About the Conference

The Main moto behind this conference is bridging the science policy practice gaps and deriving actionable and policy-oriented measures that can potentially transform societies. In the dialogue sessions, panelists drawn from academia, parliamentary forums, development actors and practitioners as well as local community members will be invited to discuss key issues in the global development agenda. This Conference is an academic and research activity, it is a movement that has created a platform for dialogues and deliberations at a local, national as well as global level. It aspires towards creating a value based, humane and sustainable future for business, academia, Government, civil society groups, NGOs and thinkers and practitioners covering all disciplines of management and beyond to include all other domains of pursuit of knowledge and practice. It dreams of leaving behind for posterity ethically driven business organizations, a sane and happy society, and a sustainable planet earth to be created by visionary, conscientious and inspired leaders of thought and action from enlightened Academic and Research Institutions.

Goals and Objectives of the Conference

Currently, Multidisciplinary research has become the most viable and efficient way to solve the problem. In this era of rapidly changing society, many kinds of socio-economic problems, related to other disciplines such as politics, anthropology, psychology, have arisen which require a holistic approach to find their solution.

When we speak of a multidisciplinary, transdisciplinary or interdisciplinary research team, we imply collaboration between people from different disciplines. Thus the concept of a multidisciplinary research team can be considered as a subset of the concept of collaborative research

Benefits of Conference

This will be facilitated by sharing of the knowledge and techniques Among Researchers and Academia

Access To Expertise

Sharing of tasks, pooling of specialised teams to complement each other while carrying out a project that could not be carried out by a single individual

Formal Division of Labour

Collaboration is even more intriguing when the knowledge is implied and isn't already published.

Transfer of Knowledge & Skills

Collaboration leads to a mixing of ideas and a confrontation of points of view which should in turn Stimulate Creativity

Stimulates Out-of-the-Box-Thinking

Researchers increase their respective network of contacts in the scientific community through collaboration

Collaboration Reduces the Isolation of Researchers

This will be made possible through dissemination actions on both sides of each employee
